

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Claims

- 1) (Currently amended) A portable display system arranged to be carried and manipulated by a human operator, said portable display system comprising:
 - a. a display device capable of displaying an output message;
 - b. a media generating means connected to said display device and capable of generating an output message;
 - c. power supply means able to provide electrical power to said portable display system;
 - d. a transport means adapted to transport said media generating means and said power supply means and adapted to be carried by said human operator, said transport means comprising:
 - i. a support ~~frame~~structure;
 - ii. a plurality of fastening means;
 - e. a command means for generating an input command from a user, said user being different from said human operator and said command means being connected to said media generating means;

wherein said output message displayed by said display device and generated by said media generating means can be interactively modified upon the generation of said input command.
- 2) (Currently amended) A portable display system as claimed in claim 1, further characterized in that ~~said~~said support structure comprises a support frame and a base support means fixedly mounted thereto, and in that said transport means further comprises a carrying sack fixedly mounted to said support frame.;
~~a base support means fixedly mounted to said support frame;~~

~~b. a carrying sack fixedly mounted to said support frame.~~

- 3) (Currently amended) A portable display system as claimed in claim 1, further characterized in that said transport means further comprises:
- a. an elongated support member having first end and second end, said second end being fixedly attached to said support ~~frame~~structure;
 - b. mounting means for attaching said display device to said elongated member first end.
- 4) (Previously presented) A portable display system as claimed in claim 2, further characterized in that said transport means further comprises:
- a. an elongated support member having first end and second end, said second end being fixedly attached to said base support means;
 - b. mounting means for attaching said display device to said elongated member first end.
- 5) (Previously amended) A portable display system as claimed in claim 1, wherein said display device is a liquid crystal display (LCD) screen.
- 6) (Previously presented) A portable display system as claimed in claim 1, wherein said media generating means comprises media processing means.
- 7) (Previously presented) A portable display system as claimed in claim 6, wherein said media generating means further comprises a digital media player.
- 8) (Previously presented) A portable display system as claimed in claim 1, wherein said media generating means comprises:
- a. a digital media player;
 - b. media processing means.

- 9) (Previously amended) A portable display system as claimed in claim 8, wherein said digital media player is a digital versatile disk (DVD) player.
- 10) (Previously amended) A portable display system as claimed in claim 8, wherein said media processing means is a game console or a portable computer.
- 11) (Cancelled)
- 12) (Previously amended) A portable display system as claimed in claim 10, wherein said command means are connected with wires or wirelessly to said game console or to said portable computer.
- 13) (Cancelled)
- 14) (Previously amended) A portable display system as claimed in claim 12, wherein said command means are a joystick or a game pad or a remote control or a gyroscopic mouse or a keyboard or a touchscreen.
- 15) (Cancelled)
- 16) (Cancelled)
- 17) (Cancelled)
- 18) (Cancelled)
- 19) (Cancelled)
- 20) (Cancelled)
- 21) (Previously amended) A portable display system as claimed in claim 10, further comprising wireless communication means connecting said game console or said portable computer to a computer network.
- 22) (Cancelled)

23) (Currently amended) A portable display system as claimed in claim 21, wherein said wireless communication means is a Radio-Frequency (RF) communication system ~~or a cellular communication system of a Wi-Fi communication system.~~

24) (Cancelled)

25) (Cancelled)

26) (Cancelled)

27) (Cancelled)

28) (Cancelled)

29) (Currently amended) A portable display system as claimed in claim 1, wherein said portable display system further comprises speakers ~~a sound generating means connected to said media generating means.~~

30) (Cancelled)

31) (Cancelled)

32) (Cancelled)

33) (Previously presented) A portable display system as claimed in claim 1, further comprising short message service (SMS) and multimedia message service (MMS) interface means connected to said media generating means.

34) (Previously presented) A portable display system as claimed in claim 2, wherein said carrying sack is a shell made of rigid material.

35) (Previously presented) A portable display system as claimed in claim 34, wherein said rigid material is a hard plastic.

36) (Previously presented) A portable display system as claimed in claim 1, further

comprising:

- a. an telescopic pole having first end and second end;
 - b. mounting means for attaching said display device to said telescopic pole first end;
- wherein said telescopic pole can be used by said human operator to carry said display device or to support said display device on the ground.

37) (Cancelled)

38) (Previously amended) A portable display system as claimed in claim 36, wherein said display device is a projector.

39) (Cancelled)
